### INDEPENDENT AUDITOR'S REPORT

Board of Public Works Rolla Municipal Utilities

#### **Report on the Financial Statements**

#### **Opinions**

We have audited the accompanying financial statements of the Rolla Municipal Utilities (RMU), a component unit of the City of Rolla, Missouri, for the year ended September 30, 2023, and the related notes to the financial statements, which collectively comprise the RMU's basic financial statements as listed in the table of contents.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of RMU, as of September 30, 2023, and the changes in financial position and cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

### **Basis for Opinions**

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States of America. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of RMU and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

### **Change in Accounting Principle**

As described in Note 1M and 6 to the financial statements, in 2023, RMU adopted new accounting guidance, GASB Statement No. 96, *Subscription-Based Information Technology Arrangements*. Our opinion is not modified with respect to this matter.

### Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the RMU's ability to continue as a going concern within one year after the date that the financial statements are available to be issued.

### **Auditor's Responsibility**

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards and Government Auditing Standards will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements, including omissions, are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to
  fraud or error, and design and perform audit procedures responsive to those risks. Such
  procedures include examining, on a test basis, evidence regarding the amounts and disclosures
  in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit
  procedures that are appropriate in the circumstances, but not for the purpose of expressing an
  opinion on the effectiveness of the RMU's internal control. Accordingly, no such opinion is
  expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant
  accounting estimates made by management, as well as evaluate the overall presentation of the
  financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about RMU's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

#### **Other Matters**

### **Required Supplementary Information**

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and required supplemental information, as listed in the table of contents, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operation, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

### **Other Information**

As discussed in Note 1, the financial statements present only the Rolla Municipal Utilities and do not purport to, and do not, present fairly the financial position of the City of Rolla, Missouri as of September 30, 2023 and the changes in its financial position, or, where applicable, its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

Our audit was conducted for the purpose of forming an opinion on the basic financial statements of the RMU. The other supplemental information, as listed in the table of contents, is presented for purposes of additional analysis and is not a required part of the basic financial statements. The other supplemental information is the responsibility of management and was derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the other supplemental information is fairly stated in all material respects in relation to the basic financial statements as a whole.

### Other Reporting Required by Government Auditing Standards

In accordance with Government Auditing Standards, we have also issued our report dated April 18, 2024, on our consideration of the RMU's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the RMU's internal control over financial reporting and compliance.

Hood & Associates CPAs PC

Kansas City, Missouri April 18, 2024

### Introduction

Rolla Municipal Utilities (RMU) is a component unit of the City of Rolla, Missouri (the City). This discussion and analysis of financial performance and activities of RMU is for the fiscal year ending September 30, 2023.

Since 1945 RMU has provided electric and water services to the City and has been under the direction of the Rolla Board of Public Works (RBPW). Power supply is purchased from the Missouri Public Energy Pool in Columbia, Missouri. RMU also operates thirty-four (34) megawatts of distributed diesel fired generation located throughout the City. RMU derives its water supply from a deep well system. RMU currently services approximately 9,700 active electric meters and 7,980 active water meters.

### **Financial Highlights**

- The assets and deferred outflows of resources of RMU exceeded its liabilities and deferred inflows
  of resources at the close of the fiscal year ending September 30, 2023, by \$67,869,110 (net
  position). Of this amount, \$32,115,538 (unrestricted net position) may be used to meet the RMU's
  ongoing obligations to citizens and creditors.
- The RMU's total net position increased by \$727,934 for the year ended September 30, 2023.
- The RBPW is the governing body of RMU and it is their obligation to oversee the operation of the
  utility and set RMU retail rates. RMU is a "cost of service" utility. Rates are adjusted in order to
  maintain fiscal stability.

### **Overview of the Financial Statements**

The discussion and analysis serve as an introduction to RMU's basic financial statements. RMU's financial statements are comprised of two components, fund financial statements and notes to financial statements. This report also contains other supplementary information in addition to the basic financial statements.

#### **Fund Financial Statements**

RMU maintains two enterprise funds that are used to charge customers for electric and water services. These are used to account for all of RMU's activities.

#### **Notes to Financial Statements**

The notes provide additional information that is essential to a full understanding of the data provided in the financial statements. The notes to financial statements can be found immediately following the basic financial statements.

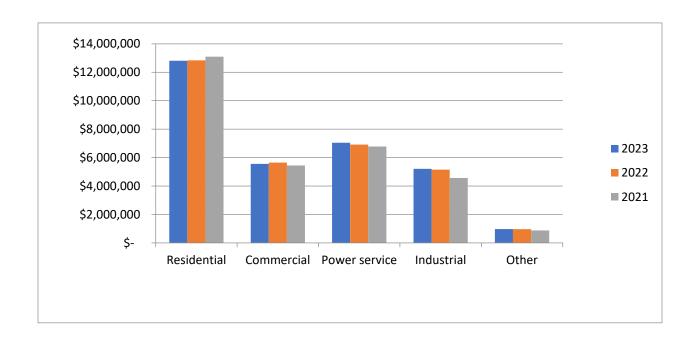

A summary of financial position follows:

### **Capital Assets and Debt Administration**

### **Capital Assets**

RMU's investment in capital assets as of September 30, 2023, is \$31.7 million (net of accumulated depreciation). The investment in capital assets includes land, buildings and improvements, office furniture, fixtures and equipment, transportation equipment, distribution, and production systems. In 2021, RMU completed the Asset Purchase Agreement with Ameren Transmission Company of Illinois which resulted in a gain on disposal of capital assets of approximately \$8.3 million. Additional information regarding RMU's capital assets can be found in Notes 1 and 5 in the basic financial statements.

| SBITA payable | \$ | 150,568        | \$   | 190,000 | \$   | 365,000 |  |  |

### **Currently Known Facts**

Power supply cost remains the largest expense in the electric department at 70.8 percent of total expenses. Overall, electric revenues decreased approximately 0.44% or \$125,000 compared to FY 2022. Overall water and electric meter count continue to increase due to commercial and residential development. RMU continues to follow an industry trend where energy conservation and efficiency appear to be reducing average energy usage per meter. A similar trend of lower water consumption per meter is also occurring in the water department. The Rolla Board of Public Works continues to monitor this trend and has taken proactive steps to insulate RMU from these fluctuations by instituting appropriate Service Availability Fees and adjusting these fees as required.

#### NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Rolla Municipal Utilities (RMU) provides electric and water services to the citizens of Rolla, Missouri. In accordance with Missouri law, RMU is operated by a Board of Public Works, the members of which are appointed by the Mayor and approved by the City Council. The component unit financial statements reflect the results of certain transactions between the City and RMU under this arrangement. Bonded debt must be authorized by an ordinance of the City Council and approved by a vote of the citizens. There is no bond indebtedness outstanding.

The accounting and reporting policies of RMU conform to generally accepted accounting principles (GAAP) in the United States of America applicable to local governments. The following represent the more significant accounting and reporting policies and practices of RMU.

### A. Financial Reporting Entity

The financial statements of RMU include the financial activities of RMU and any component units, entities which are financially accountable to RMU. A component unit is a legally separate organization for which the elected officials of its primary government are financially accountable. RMU is a component unit of the City of Rolla, Missouri, and is included as a component unit in the City of Rolla, Missouri basic financial statements. These component unit financial statements present only the operations of RMU.

### B. Basis of Accounting

The financial statements of RMU have been prepared in conformity with GAAP. Under this method, revenues are recorded when earned and expenses are recorded at the time liabilities are incurred.

Revenues and expenses are categorized as either operating or nonoperating. Operating revenues and expenses include charges that are assessed to the beneficiaries of the service and the cost of providing the service. Nonoperating and other activities primarily include investment income, interest expense, gain on sale of capital assets, and capital contributions.

#### C. Cash and Investments

For purposes of the statement of cash flows, RMU considers all accounts subject to withdrawal by check or on demand to be cash equivalents. All other deposits and certificates of deposit are considered to be investments. Investments are stated at fair value. Fair value for investments are determined by closing market prices at yearend as reported by the custodian.

### D. Prepaid Items

Prepaid items reflect the payment of insurance premiums for coverage that benefits more than one fiscal period. The premium amounts are amortized using the consumption method over the policy periods in both the government-wide and fund financial statements.

### E. Leases Receivable

The RMU's leases receivable is measured at the present value of the lease payments expected to be received during the lease term. There are no variable components under the lease agreements. A deferred inflow of resources is recorded for the lease. The deferred inflow of resources is recorded at the initiation of the lease in an amount equal to the initial recording of the lease receivable. The deferred inflow of resources is amortized on a straight-line basis over the term of the lease.

#### F. Inventories

Inventories are stated at the lower of cost or market. Cost is determined by the average cost method.

### G. Capital Assets

Capital assets are recorded at cost or estimated historical cost. Expenditures for maintenance and repairs are charged to current operating expense. Renewals and betterments of existing assets that extend the useful life of the asset are capitalized and depreciated. Capital assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated assets are recorded at estimated fair value as of the date of the donation.

Capital assets are defined by the RMU as assets with an initial, individual cost of \$10,000 or more and an estimated useful life of greater than one year. Additions or improvements and other capital outlays that significantly extend the useful life of an asset, or that significantly increase the capacity of an asset are capitalized. Fully depreciated capital assets are included in their respective accounts until their disposal. Depreciation is being computed on the straight-line method, using assets lives as follows:

| Assets                                    | Years                         |
|---|-------------------------------|
| Electric plant:                           |                               |
| General electric plant                    | 20                            |
| Transportation equipment                  | 6 <sup>2</sup> / <sub>3</sub> |
| Power operated equipment                  | 6 <sup>2</sup> / <sub>3</sub> |
| Stores, laboratory, tools, communication, |                               |
| and miscellaneous equipment               | 10                            |
| Water plant:                              |                               |
| General water plant                       | 33⅓                           |
| Pumping plant                             | 10                            |
| Chlorination and fluoridation equipment   | 20                            |
| Laboratory and general equipment          | 10                            |

### H. Capitalization of Costs Related to Construction of Assets

In connection with the construction of assets, RMU capitalizes payroll and overhead directly related to the project. It is RMU's policy not to capitalize general overhead and engineering expenses related to construction projects.

### I. Compensated Absences

Under terms of RMU's personnel policy, employees are granted paid time off (PTO) in varying amounts. All regular full-time employees will earn six (6) hours PTO at regular pay for each pay period worked until they have completed five (5) years of employment and may accumulate up to the maximum of 288 hours. Following their fifth year of continuous employment, they will earn eight (8) hours PTO at regular pay for each pay period worked until they have completed fifteen (15) years of employment and may accumulate up to the maximum of 384 hours. Following their fifteenth year of continuous employment, they will earn nine (9) hours PTO at regular pay for each pay period worked until they have completed twenty (20) years of employment and may accumulate up to the maximum of 432 hours. Following their twentieth year of continuous employment, they will earn ten (10) hours PTO at regular pay for each pay period worked and may accumulate up to the maximum of 480 hours. An employee may accumulate PTO to the maximum based on their years of service. If an employee has accumulated the maximum PTO, they will stop earning additional PTO until their balance of PTO accumulated is less than the maximum. In the event of termination or separation, employees are compensated for accumulated PTO hours up to their maximum PTO hours. Liabilities for PTO are determined at the end of the year based on current salary/hourly rates.

#### J. Deferred Outflows/inflows of Resources

In addition to assets, the statement of net position will sometimes report a separate section for deferred outflows of resources. This separate financial statement element, deferred outflows of resources, represents a consumption of net assets that applies to a future period(s) and so will not be recognized as an outflow of resources (expense/expenditure) until then. The RMU has two items that qualify for reporting in this category. The first item results from actuarial assumption changes, the difference between actual and projected earnings in calculating the net pension asset, and pension contributions made by the RMU subsequent to the pension valuation date. The contribution amount will be applied during the next fiscal year while the changes in actual versus projected amounts will be amortized over five to seven years. The second item results from assumption changes in calculating the RMU's OPEB liability.

In addition to liabilities, the statement of net position will sometimes report a separate section for deferred inflows of resources. This separate financial statement element, deferred inflows of resources, represents an acquisition of net position that applies to a future period(s) and so will not be recognized as an inflow of resources (revenue) until that time. The RMU has three items that qualify for reporting in this category. The first item relates to the change in actual and projected experience in calculating the pension liability. These amounts are deferred and recognized as an inflow of resources in the period that the amounts become available. The second item relates to the change in assumptions in calculating the OPEB obligation. The pension and OPEB related amounts are amortized over five to 14 years. The third item relates to leases receivable which will be recognized inflow of resources in future periods over the term of the leases.

For purposes of measuring the net pension asset or liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the Missouri Local Government Employees Retirement System (LAGERS) and additions to/deductions from LAGERS fiduciary net position have been determined on the same basis as they are reported by LAGERS. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

### K. Net Position Classification

Equity is classified into three components -- net investment in capital assets; restricted; and unrestricted. These classifications are defined as follows:

Net investment in capital assets -- consists of capital assets, net of accumulated depreciation, reduced by the outstanding balances of any debt that is attributable to those assets.

Restricted -- consists of assets that have constraints placed upon their use through external constraints imposed either by creditors (such as through debt covenants) or through laws, regulations, or constraints imposed by law through constitutional provisions or enabling legislation, reduced by any liabilities to be paid from these assets. When an obligation is incurred for which both restricted and unrestricted net position are available, it is RMU's policy to first apply restricted resources in satisfying that obligation, followed by the utilization of unrestricted resources.

Unrestricted -- consists of net position that do not meet the definition of restricted or net investment in capital assets.

#### L. Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

### M. New Accounting Standard

The RMU implemented Government Accounting Standards Board (GASB) Statement No 96, Subscriptions-Based Information Technology Arrangements (SBITA), effective for the year ended September 30, 2023. The statement is to better meet the information needs of financial statement users by improving accounting and financial reporting for subscription-based information technology arrangements by governments. This Statement increases the usefulness of governments' financial statements by defining and establishing a SBITA that results in a right-to-use subscription intangible asset and a corresponding subscription liability. The Statement establishes a single model for SBITA accounting based on the foundational principle that SBITAs are financings of the right to use and underlying asset much like the standards established in Statement No. 87, Leases. Under this Statement, a government is required to recognize a SBITA liability and an intangible right-to-use asset, and a government should recognize amortization of the discount on the subscription liability as an outflow of resources in subsequent financial reporting periods, thereby enhancing the relevance and consistency of information about the RMU's subscription activities.

As part of implementing the Statement, the RMU performed a comprehensive review of its subscriptions and applied the criteria within the guidance. As a result, beginning net position and fund balance was not affected.

### **NOTE 2 - CASH AND INVESTMENTS**

Custodial credit risk for deposits is the risk that in the event of a bank failure, RMU's deposits may not be returned or will not be able to recover collateral securities in the possession of an outside party. RMU's bank deposits are required by state law to be secured by the deposit of certain securities specified at RSMo 30.270 with RMU or trustee institution. The value of the securities must amount to the total of RMU's cash not insured by the Federal Deposit Insurance Corporation. As of September 30, 2023 and 2022, RMU's bank balances were entirely secured or collateralized with securities held by RMU or by its agent in RMU's name.

### **NOTE 3 - ACCOUNTS RECEIVABLE**

Accounts receivable are presented net of an allowance for doubtful accounts as follows:

|                                | September 30, |           |  |    |           |  |  |
|--------------------------------|---------------|-----------|--|----|-----------|--|--|
|                                |               | 2023      |  |    | 2022      |  |  |
| Accounts receivable:           |               |           |  |    |           |  |  |
| Utilities receivable including |               |           |  |    |           |  |  |
| refundable deposits            | \$            | 2,127,794 |  | \$ | 1,904,395 |  |  |
| Unbilled utilities receivable  |               | 2,047,266 |  |    | 2,059,661 |  |  |
| Allowance for uncollectibles   |               | (60,000)  |  |    | (60,000)  |  |  |
| Net accounts receivable        | \$            | 4,115,060 |  | \$ | 3,904,056 |  |  |

### **NOTE 4 – LEASES RECEIVABLE**

In August 2018, the RMU entered into a 1-year renewable lease with Investment Realty. Under the lease, Investment Realty pays RMU \$1,200 monthly for office space. There are no variable components in the lease. The tenant may continue to renew the term of the lease for successive one-year terms by sending written notice of renewal to the RMU no later than 90 days prior to the expiration of the prior one-year term. RMU management anticipates the tenant will continue to renew the lease for an additional nine-year term. The lease receivable is measured as the present value of the future rent payments expected to be received during the lease term at a discount rate of 4%, which is the lessee's implicit interest rate. At September 30, 2023 the lease receivable balance was \$65,159.

In February 2020, the RMU entered into a 1-year renewable lease with Rolla Regional Economic Development Commission (RREDC). Under the lease, RREDC pays RMU \$500 monthly for office space. There are no variable components in the lease. The tenant may continue to renew the term of the lease for successive three-year term by sending written notice of renewal to the RMU no later than 60 days prior to the expiration of the initial lease term. RMU management anticipates it is probable that the tenant will renew the lease for an additional three-year term. The lease receivable is measured as the present value of the future rent payments expected to be received during the lease term at a discount rate of 4%, which is the lessee's implicit interest rate. At September 30, 2023, the lease receivable balance was \$2,965.

In March 2017, the RMU entered into a 10-year renewable lease with Fidelity Cablevision, Inc (Fidelity). Under the lease, Fidelity pays RMU \$45,420 annually for the right to place attachments on utility poles owned by RMU. There are no variable components in the lease. Fidelity may continue to renew the term of the lease for four additional five-year terms by sending written notice of renewal to the RMU no later than 120 days prior to the expiration of the initial lease term. The lease receivable is measured as the present value of the future rent payments expected to be received during the lease term at a discount rate of 4%, which is the lessee's implicit interest rate. At September 30, 2023 the lease receivable balance was \$692,517.

In January 2019, the RMU entered into a 10-year renewable lease with Landis+Gyr Technology, Inc (Landis). Under the lease, Landis pays RMU \$850 annually for the right to place attachments on utility poles owned by RMU. There are no variable components in the lease. The RMU and Landis mutually agreed to terminate the agreement during the year ended September 30, 2023. The outstanding lease receivable was offset against the deferred inflows of resources and the difference was charged to operations.

In July 2020, the RMU entered into a 10-year renewable lease with Socket Telecom, Inc (Socket). Under the lease, Socket pays RMU \$975 annually for the right to place attachments on utility poles owned by RMU. There are no variable components in the lease. Socket may continue to renew the term of the lease for four additional five-year terms by sending written notice of renewal to the RMU no later than 120 days prior to the expiration of the initial lease term. The lease receivable is measured as the present value of the future rent payments expected to be received during the lease term at a discount rate of 4%, which is the lessee's implicit interest rate. At September 30, 2023 the lease receivable balance was \$15.291.

In March 2023, the RMU entered into a 10-year renewable lease with Ameren Missouri (Ameren). Under the lease, Ameren pays RMU \$1,980 annually for the right to place attachments on utility poles owned by RMU. There are no variable components in the lease. Ameren may continue to renew the term of the lease for two additional five-year terms, with an escalating per unit cos, by sending written notice of renewal to the RMU no later than 120 days prior to the expiration of the initial lease term. The lease receivable is measured as the present value of the future rent payments expected to be received during the lease term at a discount rate of 8.5%, which is the lessee's implicit interest rate. At September 30, 2023 the lease receivable balance was \$22,020.

For the year ended September 30, 2023, the RMU recognized \$47,459 of lease revenue and \$32,080 of interest revenue under the leases.

The RMU's leases receivable activity for the year ended September 30, 2023, is as follows:

|                        | E  | Balance                               |    |        |                |        | E  | Balance |                      |        |  |         |  |
|------------------------|----|---------------------------------------|----|--------|----------------|--------|----|---------|----------------------|--------|--|---------|--|
| October 1,             |    |                                       |    |        | September      |        |    |         |                      |        |  |         |  |
| Lease Description      |    | , , , , , , , , , , , , , , , , , , , |    |        | 2022 Additions |        |    | Ret     | Retirements 30, 2023 |        |  | Current |  |
| Facility space         | \$ | 85,422                                | \$ | -      | \$             | 17,298 | \$ | 68,124  | \$                   | 14,978 |  |         |  |
| Pole attachments       |    | 735,706                               |    | 22,020 |                | 29,247 |    | 728,479 |                      | 18,333 |  |         |  |
| Total lease receivable | \$ | 821,128                               | \$ | 22,020 | \$             | 46,545 | \$ | 796,603 | \$                   | 33,311 |  |         |  |

The future minimum lease payment due under the lease arrangement for the years ending September 30, 2023 are as follows:

|           | Lease Receivable |     |        |      |       |          |  |  |
|-----------|------------------|-----|--------|------|-------|----------|--|--|
|           | Princip          | al  | Inter  | est  | Total |          |  |  |
| 2024      | \$ 33,           | 311 | \$ 32  | ,464 | \$    | 65,775   |  |  |

### **Leases Payable**

RMU entered into a lease purchase agreement during the year ended September 30, 2003, for construction of water towers and other improvements. The lease agreement calls for varying semi-annual principal payments through 2023 with interest at 3.55%. The lease was paid off during the year ended September 30, 2023.

### **Subscription-Based Information Technology Arrangements**

Per GASB Statement No. 96, a subscription-based information technology arrangement (SBITA) is defined as a contract that conveys control of the right to use another party's (a SBITA vendor's) information technology (IT) software, alone or in combination with tangible capital assets (the underlying IT assets), as specified in the contract for a period of time in an exchange or exchange-like transaction. The measurement of the subscription liabilities is based on the present value of lease payments expected to be paid during the subscription term, such as fixed payments, variable payments that depend on an index or rate, variable payments that are fixed in substance, and residual value guarantee payments that are fixed in substance.

As of September 30, 2023, the RMU had minimum principal and interest payment requirements for its subscription activities, with a remaining term more than one year, as follows:

| Year Ending   |    |                  |                       |                        |

### **NOTE 7 - EMPLOYEES RETIREMENT SYSTEM**

### Plan Description

The RMU's defined benefit pension plan provides certain retirement, disability, and death benefits to plan members and beneficiaries. The RMU participates in the Missouri Local Government Employees Retirement System (LAGERS). LAGERS is an agent multiple-employer, statewide public employee pension plan established in 1967 and administered in accordance with RSMo. 70.600-70.755. As such, it is LAGERS responsibility to administer the law in accordance with the expressed intent of the General Assembly. The plan is qualified under the Internal Revenue Code Section 401(a) and is tax exempt. The responsibility for the operations and administration of LAGERS is vested in the LAGERS Board of Trustees consisting of seven persons. LAGERS' issues a publicly available financial report that includes financial statements and required supplementary information. This report may be obtained by accessing the LAGERS website at www.molagers.org.

#### Benefits Provided

LAGERS provides retirement, death, and disability benefits. Benefit provisions are adopted by the governing body of the employer, within the options available in the state statutes governing LAGERS. All benefits vest after 5 years of credited service. Employees who retire on or after age 60 with 5 or more years of service are entitled to an allowance for life based upon the benefit program information provided below. Employees may retire with an early retirement benefit with a minimum of 5 years of credited service and after attaining age 55 and receive a reduced allowance.

|                      | 2023 Valuation |
|----------------------|----------------|
|                      |                |
| Benefit Multiplier   | 2% for life    |
| Final Average Salary | 3 Years        |
| Member Contributions | 0%             |

Benefit terms provide for annual post-retirement adjustments to each member's retirement allowance subsequent to the member's retirement date. The annual adjustment is based on the increase in the Consumer Price Index and is limited to 4% per year.

### **Employees Covered by Benefit Terms**

The following employees were covered by the benefit terms:

| Inactive employees or beneficiaries currently |     |
|---|-----|
| receiving benefits                            | 44  |
| Inactive employees entitled to but not yet    |     |
| receiving benefits                            | 10  |
| Active employees                              | 57  |
|   |     |
|   | 111 |

### **Contributions**

The RMU is required to contribute amounts at least equal to the actuarially determined rate, as established by LAGERS. The actuarially determined rate is the estimated amount necessary to finance the cost of benefits earned by employees during the year, with an additional amount to finance an unfunded accrued liability. Full-time employees of the employer do not contribute to the pension plan. The RMU contribution rate is 8.2% of annual covered payroll.

### Net Pension Liability

RMU's net pension liability was measured as of June 30, 2023, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of February 28, 2023.

### **Actuarial Assumptions**

The total pension liability in the February 28, 2023 actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement:

Inflation 2.75% wage inflation; 2.25% price inflation Salary Increase 2.75% to 6.75% including wage inflation 7.00%, net of investment expenses

The healthy retiree mortality tables, for post-retirement mortality, used in evaluating allowances to be paid were 115% of the PubG-2010 Retiree Mortality Table for males and females. The disabled retiree mortality tables, for post-retirement mortality, used in evaluating allowances to be paid were 115% of the PubNS-2010 Disabled Retiree Mortality Table for males and females. The pre-retirement mortality tables used were 75% of the PubG-2010 Employee Mortality Table for males and females of General groups and 75% of the PubS-2010 Employee Mortality Table for males and females of Police, Fire and Public Safety groups.

Mortality rates for a particular calendar year are determined by applying the MP-2020 mortality improvement scale to the above described tables.

The long-term expected rate of return on pension plan investments was determined using a model method in which the best-estimate ranges of expected future real rates of return (expected returns, net of investment expenses and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. The target allocation and best estimates of arithmetic real rates of return for each major asset class are summarized in the following table:

|                  | Target     | Long-Term Expected  |
|------------------|------------|---------------------|
| Asset Class      | Allocation | Real Rate of Return |
| Alpha            | 15.00%     | 3.67%               |
| Equity           | 35.00%     | 4.78%               |
| Fixed Income     | 31.00%     | 1.41%               |
| Real Assets      | 36.00%     | 3.29%               |
| Strategic Assets | 8.00%      | 5.25%               |
| Cash/Leverage    | -25.00%    | -29.00%             |

#### Discount Rate

The discount rate used to measure the total pension liability is 7.00%. The projection of cash flows used to determine the discount rate assumes that employer and employee contributions will be made at the rates agreed upon for employees and the actuarially determined rates for employers. Based on these assumptions, the pension plan's fiduciary net position was projected to be available to pay all projected future benefit payments of current active and inactive employees. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payment to determine the total pension liability.

### Changes in the Net Pension Liability/ (Asset)

|                                     | Increase (Decrease)                   |               |     |                |  |  |  |

| Plan Fiduciary Net Position   |    | (26,797,412)        |                | (26,797,412) |    | (26,797,412)        |
| Net Pension Liability (Asset) | \$ | 526,075             | \$             | (2,705,985)  | \$ | (5,387,909)         |

### Pension Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

For the year ended September 30, 2023, the RMU recognized LAGERS pension expense of \$227,482. The RMU reported deferred outflows and inflows of resources related to LAGERS pension from the following sources:

|                                 | Deferred  |           | Deferred |           | Net |           |
|---------------------------------|-----------|-----------|----------|-----------|-----|-----------|
|                                 | Outflows  |           | Inflows  |           |     | Inflows   |
|                                 |           |           |          |           |     |           |
| Assumption changes              | \$        | -         | \$       | (183,201) | \$  | (183,201) |
| Difference in experience        | 1,286,231 |           |          | (11,843)  |     | 1,274,388 |
| Excess investment returns       |           | 303,747   |          | -         |     | 303,747   |
| Contributions subsequent to the |           |           |          |           |     |           |
| measurement date*               |           | 76,627    |          |           |     | 76,627    |
| Total                           | \$        | 1,666,605 | \$       | (195,044) | \$  | 1,471,561 |

<sup>\*</sup>The amount reported as deferred outflows of resources resulting from contributions subsequent to the measurement date will be recognized as a reduction in the Net Pension Liability/(Asset) for the year ending September 30, 2024.

Net amounts reported as deferred outflows and deferred inflows of resources, excluding contributions subsequent to the measurement date, related to LAGERS pension will be recognized in pension expense as follows:

| Year ending September 30: | Total           |
|---------------------------|-----------------|
| 2024                      | \$<br>184,230   |
| 2025                      | (78,304)        |
| 2026                      | 852,447         |
| 2027                      | 425,022         |
| 2028                      | <br>11,539      |
| Total                     | \$<br>1,394,934 |

### Payable to the Pension Plan

At September 30, 2023, there were no outstanding contributions payable to the LAGERS pension plan.

### NOTE 8 - POST-EMPLOYMENT BENEFITS OTHER THAN PENSIONS

### Plan Description

RMU's OPEB plan (the Plan) provides OPEB for qualifying full-time employees of RMU. The Plan is a single employer defined benefit OPEB plan administered by RMU. The Plan, as established by RMU resolution, assigned the authority to establish and amend the benefit terms and financing requirements to RMU. No assets are accumulated in a trust for the Plan. The Plan does not issue a stand-alone report.

#### Benefits Provided

The Plan provides healthcare benefits to qualifying employees hired prior to July 1, 2008, who have attained 20 years of service and are eligible to receive retirement benefits. Employees are eligible to retire once they have attained age 55 plus 5 years of service. This benefit terminates when retiree reaches Medicare eligibility age (65). RMU pays the monthly group health insurance premium for the retiree electing this benefit and the retiree must reimburse RMU for the full premium to retain coverage.

### **Employees Covered by Benefit Terms**

As of the September 30, 2022, actuarial valuation date, the following employees were covered by the benefit terms:

| Active employees    | 26 |
|---------------------|----|
| Retirees            | -  |
| Spouses of retirees |    |
| Total               | 26 |

### Total OPEB Liability

RMU's total OPEB liability was measured as of September 30, 2023 and was determined by an actuarial valuation as of September 30, 2022.

### Actuarial Assumptions and Other Inputs

The total OPEB liability was determined by the September 30, 2022 actuarial valuation date, calculated based on the discount rate and the following actuarial assumptions projected forward to the September 30, 2023 measurement date.

Inflation 2.30%
Salary increases 3.00% including inflation
Discount rate 4.09%
Healthcare cost trend rates Medical cost trend rate of 6.1% for 2022, gradually decreasing to an ultimate rate of 3.7% for 2073 and beyond.

The discount rate was based on the 20 year bond GO index at the end of the fiscal year. The rate for the prior fiscal year was 4.02%.

Mortality rates were based on the Pub-2010 Healthy Annuitant mortality table for males and females, as appropriate, with generational projection based on Scale MP-2021.

### Changes in the Total OPEB Liability

|   | September 30,<br>2023 |         |    | September 30,<br>2022 |  |  |
|---|-----------------------|---------|----|-----------------------|--|--|

| Benefit payments, net of contributions  |                       | (1,021) |    | -                     |  |  |
| Net changes                             |                       | 17,123  | •  | (112,135)             |  |  |
| Balances at end of year                 | \$                    | 331,449 | \$ | 314,326               |  |  |

### Sensitivity of the Total OPEB Liability to Changes in the Discount Rate

The following presents the total OPEB liability of RMU, calculated using the discount rate of 4.09%, as well as what RMU's total OPEB liability would be if it were calculated using a discount rate that is 1% point lower (3.09%) or 1% point higher (5.09%) than the current discount rate:

|                      |    | Decrease<br>3.09% | Discount Rate<br>4.09% |         | 1% Increase<br>5.09% |    |         |
|----------------------|----|-------------------|------------------------|---------|----------------------|----|---------|
| Total OPEB liability | \$ | 360,590           | \$                     | 331,449 |                      | \$ | 304,435 |

### Sensitivity of the Total OPEB Liability to Changes in the Healthcare Cost Trend Rates

The following presents the total OPEB liability of RMU, calculated using the healthcare cost trend rates as well as what the Utility's total OPEB liability would be if it were calculated using healthcare cost trend rates that are 1% point lower or 1% point higher than the current healthcare cost trend rates:

|                      |             | Current |    |          |             |         |  |  |  |  |  |
|----------------------|-------------|---------|----|----------|-------------|---------|--|--|--|--|--|
|                      | 1% Decrease |         | Tr | end Rate | 1% Increase |         |  |  |  |  |  |
| Total OPEB liability | \$          | 295,849 | \$ | 331,449  | \$          | 372,073 |  |  |  |  |  |

### OPEB Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to OPEB

For the year ended September 30, 2023, RMU recognized OPEB benefit of \$2,789. Deferred outflows and inflows of resources related to OPEB are from the following sources:

|   | Deferred |                     | Deferred             |                       |  |
|---|----------|---------------------|----------------------|-----------------------|--|
|   |          | utflows<br>esources | Inflows of Resources |                       |  |
| Difference between expected and actual experience | \$       | -                   | \$                   | (96,352)              |  |
| Changes in assumptions<br>Total                   | \$       | 29,077<br>29,077    | \$                   | (45,737)<br>(142,089) |  |

Amounts reported as deferred outflows and inflows of resources related to OPEB will be recognized in OPEB expense as follows:

| Year ending September 30: | Total |           |  |
|---------------------------|-------|-----------|--|
| 2024                      | \$    | (22,907)  |  |
| 2025                      |       | (22,107)  |  |
| 2026                      |       | (22,545)  |  |
| 2027                      |       | (20,362)  |  |
| 2028                      |       | (18,401)  |  |
| Thereafter                |       | (6,690)   |  |
| Total                     | \$    | (113,012) |  |

#### **NOTE 9 - RISK MANAGEMENT**

RMU is exposed to various risks of losses related to torts; theft to, damage to, and destruction of assets' errors and omissions; injuries to employees; and natural disasters. RMU has transferred its risk by obtaining coverage from Missouri Intergovernmental Risk Management Association. In addition, it has effectively managed risk through various employee education and prevention programs. There has been no significant reduction in insurance coverage from the previous year.

RMU retains the risk of loss for medial and prescription claims. RMU has purchased a specific excess insurance policy that covers medical, and prescription claims up to an individual claim limit to \$30,000 with an aggregate maximum of \$1,000,000. The claims are administered by a third party administrator. RMU has recorded an estimated liability for claims payable as of September 30, 2023 and 2022.

| Beginning of |      |        |                 |         | Pá          | ayments/ |             |        |

### **NOTE 10 - COMMITMENTS AND CONTINGENCIES**

The City of Rolla (the City) is a member of the Missouri Joint Municipal Electric Utility Commission (MJMEUC). RMU represents the City with respect to MJMEUC matters. MJMEUC manages a power pool known as Missouri Public Energy Pool #1 (MoPEP). The City is a member of MoPEP. All MoPEP members (including the City) have an agreement (the MoPEP Agreement) with MJMEUC for the purchase of electric capacity and energy from MJMEUC. The MoPEP Agreement requires MJMEUC to supply the full energy requirement of the City and includes a procedure for the City to dedicate its capacity to MoPEP.

MoPEP operations are governed by a committee (Pool Committee) consisting of one representative from each MoPEP member and is currently comprised of thirty-five (35) members. The Pool Committee is charged with setting rates for all services provided by MJMEUC to MoPEP members. These rates include recovery of all of MJMEUC's costs (the Direct Costs) incurred in connection with acquiring, providing, arranging, or financing the provision of full requirements service to MoPEP members. Such rates are based upon an annual budget and include, but are not limited to, all payments MJMEUC is required to make, or reserves or coverage MJMEUC is required to maintain, pursuant to any bond indenture, financing lease or loan agreement of other financial contract in order to procure, deliver or finance resources intended to provide full requirements service, without regard to whether any particular resource is available to or used by any particular MoPEP member. Direct Costs also include amounts required to fund MoPEP capital and/or operating reserves as may be established from time to time by the Pool Committee.

The rates are established so as to charge each MoPEP member (including the City) its proportionate share of all costs associated with MJMEUC's performance under the MoPEP Agreement. Charges based on such rates are assessed and billed monthly. Rates are required to be established at least annually and adjusted to recognize variances between budgeted and actual costs at least every six months.

To meet the power and energy requirements of the City and the other MoPEP members, MJMEUC presently obtains power and energy from the following sources: 1) power purchased under long-term firm energy contracts, unit-contingent energy contracts and interruptible contracts; 2) MJMEUC owned generation; 3) member capacity; and 4) spot market purchases. The City purchases its full energy requirements from MJMEUC pursuant to the MoPEP Agreement but does not have any ownership interest in MJMEUC's resources.

#### **NOTE 11 - RELATED PARTY TRANSACTIONS**

RMU provides water and electric services to the City of Rolla. It also provides billing and collection services to the City for PILOT, sewer, and sanitation services. The City of Rolla paid RMU \$701,466 and \$579,520, for water and electric services for the years ended September 30, 2023 and 2022, respectively. The City of Rolla paid RMU a total of \$201,351 and \$201,685, for billing services for the years ended September 30, 2023 and 2022, respectively. The City of Rolla contributed \$373,301 and \$74,154 for the years ended September 30, 2023 and 2022 for capital expenses.

### **NOTE 12 - INCENTIVES**

RMU entered into an incentive agreement with Hartmann US Inc. (the Company). RMU will provide Utility Cost Assistance discounts to the Company based on utility rates in effect at the given time. Electric energy and water consumption and wastewater utility charges will be discounted during the first 5 years of the facility's operation. Year one for the discounts began as of the first day of the month in which the Company began operating the facility. As of September 30, 2023, and 2022, RMU has discounted \$91,547 and \$49,664, respectively.

### **NOTE 13 - SUBSEQUENT EVENTS**

Management has evaluated subsequent events through April 18, 2024, the date the financial statements were available to be issued. No subsequent events were identified that required adjustment to or disclosure in the financial statements.

| 2023   | 313,552      | 306,506         | 7,046        | 3,523,056    | 8.70%        |

Valuation Date February 28, 2023

Notes: The roll-forward of total pension liability from February 28, 2023 to June 30, 2023 reflects

expected service cost and interest reduced by actual benefit payments and administrative

expenses.

Methods and assumptions used to determine contributions rates:

Actuarial cost method Entry Age Normal and Modified Terminal Funding

Amortization method A level percentage of payroll amortization method is used to amortize the UAAL over a closed

period of years. If the UAAL (excluding the UAAL associated with benefit changes) is negative, then this amount is amortized over the greater of (i) the remaining initial

amortization period or (ii) 15 years.

Remaining amortization period Multiple bases from 8 to 15 years

**Asset valuation method** 5-year smoothed market; 20% corridor

**Inflation assumption** 2.75% wage inflation; 2.25% price inflation

**Salary increases** 2.75% to 6.75% including wage inflation

**Investment rate of return** 7.00%, net of investment and administrative expenses

Retirement age Experienced-based table of rates that are specific to the type of eligibility condition

**Mortality** The healthy retiree mortality tables, for post-retirement mortality, used in evaluating

allowances to be paid were 115% of the PubG-2010 Retiree Mortality Table for males and females. The disabled retiree mortality tables, for post-retirement mortality, used in evaluating allowances to be paid were 115% of the PubNS-2010 Disabled Retiree Mortality Table for males and females. The pre-retirement mortality tables used were 75% of the PubG-2010 Employee Mortality Table for males and females of General groups and 75% of the PubS-2010 Employee Mortality Table for males and females of Police, Fire and Public Safety

groups.

Mortality rates for a particular calendar year are determined by applying the MP-2020

mortality improvement scale to the above described tables.

Other information: None
